Protecting your POS Touchscreen is our business.

Touchscreen Display Protection for POS Touchscreens

HOW IT WORKS

- In normal use, the [PosR.us](http://www.posr.us) Protector keeps the display free of any scratches, tears, gouges, dirt, dust, grease, oil, fingerprints, and debris.

THE PROBLEM

- Daily use can quickly lead to scratches on the touchscreen displays of the POS Terminal.
- Touchscreens are built to be durable but are also delicate instruments, susceptible to scratches, gouges, dirt, grease, and wear and tear due to normal use.
- Normal use of a POS calls for it to be poked and prodded on a constant basis, and certain areas that get a lot of use - for example, a print key, a cash key, or a sign-in key - will become worn to the point where that area will not respond properly to touches.
- Using pens and/ or long fingernails on the screen instead of fingertip is common and can easily tear through a touchscreen.
- A single rip, tear, scratch, or gouge can mean the end of a touchscreen. It can cause the screen's calibration to be thrown off to the point where it will no longer be usable or it simply render the screen non-functional.
- **Damage to the touchscreen due to "negligence" is a costly problem.**

THE SOLUTION

- [PosR.us](http://www.posr.us) offers the solution - a custom-fit, ultra-thin, long-lasting Touchscreen Protector!
- [PosR.us](http://www.posr.us)' patented Touchscreen Display Protectors are made of durable, 0.005 mm thick material, yet are stiff enough to stay flat on the screen without warping during use. This high-tech film is extremely scratch-resistant, fits precisely and can be removed at any time without leaving any residue behind.
- [PosR.us](http://www.posr.us) protectors also eliminate glare, enhance screen colors, and are completely bubble-free, making them nearly unnoticeable when installed. They install in minutes – it's as simple as placing the protector on the touchscreen!
- **BOTTOM LINE: [PosR.us](http://www.posr.us) protectors can help you avoid the high cost of replacing a touchscreen.**

THE ADVANTAGES

- 100% protection from scratches, tears, gouges, rips, dirt, grime, dust, oil, and grease.
- They install easily and leave absolutely **no air bubbles** between the film and the screen.
- They eliminate annoying glare and reduce noticeable fingerprints.
- You won't even notice that it's there! In addition, our screen protectors provide a pleasant-feeling touch surface, and can be easily removed without leaving any kind of residue.
- The film protectors can be custom-fit to ANY touchscreen.
- **[PosR.us](http://www.posr.us) offers reliable and permanent protection for your POS/LCD display, handheld terminal, or UMPC – simply amazing!**
